**III. MANZANA.** Es un segmento de la región que regularmente está delimitada por tres o más calles o límites semejantes, representada por los tres siguientes dígitos del mencionado número de cuenta catastral.

**IV. MANZANA CON ID POPULAR.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener los niveles de desarrollo más bajos de la Ciudad. En esta categoría se agrupa, además, las manzanas que se encuentran dentro de la zona rural de la Ciudad de México.

**V. MANZANA CON ID BAJO.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener niveles de desarrollo bajo de la Ciudad.

**VI. MANZANA CON ID MEDIO.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener niveles de desarrollo medio de la Ciudad.

**VII. MANZANA CON ID ALTO.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener los más altos niveles de desarrollo de la Ciudad.

**NORMAS DE APLICACIÓN**

**1.** Para el establecimiento del subsidio otorgado a los usuarios del suministro doméstico de agua a que hace referencia el artículo 172 del Código, se determinará primero la alcaldía a la que corresponda la toma del usuario.

**2.** Posteriormente se identificará la región-manzana a la que pertenece mediante los seis primeros dígitos de la cuenta catastral que corresponde al inmueble de uso doméstico, así como doméstico y no doméstico simultáneamente (mixto), donde se encuentra la toma.

**3.** Al identificar la región-manzana dentro de la Alcaldía se observará el tipo de manzana al que pertenece y ese remitirá, de manera directa, al subsidio que le corresponde al usuario de la toma de acuerdo al artículo 172 del Código.

**ARTÍCULO VIGÉSIMO PRIMERO.-** Para los efectos de emisión de valores unitarios del suelo, construcciones adheridas a él e instalaciones especiales a que se refiere el artículo 129 del Código, se presentan a continuación las siguientes tablas cuya aplicación se hará conforme a las definiciones y normas que se indican:

**DEFINICIONES**

**I. REGIÓN:** Es una circunscripción convencional del territorio de la Ciudad de México determinada con fines de control catastral de los inmuebles, representada con los tres primeros dígitos del número de cuenta catastral asignado por la autoridad fiscal.

**II. MANZANA:** Es una parte de una región que regularmente está delimitada por tres o más calles o límites semejantes, representada por los tres siguientes dígitos del mencionado número de cuenta, la que tiene otros dos que representan el lote, que es el número asignado a cada uno de los inmuebles que integran en conjunto una manzana, y tres dígitos más en el caso de condominios, para identificar a cada una de las localidades de un condominio construido en un lote.

**III. COLONIA CATASTRAL:** Es una porción determinada de territorio continuo de la Ciudad de México que

comprende grupos de manzanas o lotes, la cual tiene asignado un valor unitario de suelo, expresado en pesos por metro cuadrado, en atención a la homogeneidad observable en cuanto a características, exclusividad y valor comercial. Existen tres tipos de colonia catastral: Área de valor, Enclave de valor y Corredor de valor.

**a)** Colonia catastral tipo área de valor: Grupo de manzanas con características similares en infraestructura, equipamiento urbano, tipo de inmuebles y dinámica inmobiliaria.

Cada área está identificada con la letra A, seguida de seis dígitos, correspondiendo los dos primeros a la Alcaldía respectiva, los tres siguientes a un número progresivo y el último a un dígito clasificador de la colonia catastral.

Dicha clasificación es la siguiente:

**0:** Colonia catastral que corresponde a áreas periféricas de valor bajo con desarrollo incipiente, con usos del suelo que están iniciando su incorporación al área urbana y con equipamientos y servicios dispersos.

**1:** Colonia catastral que corresponde a áreas periféricas o intermedias de valor bajo, en proceso de transición o cierta consolidación, con usos del suelo eminentemente habitacionales y con equipamientos y servicios semi dispersos y de pequeña escala.

**2:** Colonia catastral que corresponde a áreas intermedias de valor medio bajo, en proceso de transición o cierta consolidación, con usos del suelo eminentemente habitacionales y/o incipiente mezcla de usos y con equipamientos y servicios semi dispersos y de regular escala.

**3:** Colonia catastral que corresponde a áreas intermedias de valor medio con cierto proceso de transición o en consolidación, con usos del suelo eminentemente habitacionales y/o mezcla de usos y con equipamientos y servicios semi concentrados y de regular escala.

**4:** Colonia catastral que corresponde a áreas urbanas, con servicios completos, equipamiento urbano en escala significativa en la zona o zonas cercanas, con usos de suelo habitacional y/o mixtos y nivel socioeconómico de medio a medio alto.

**5:** Colonia catastral que corresponde a áreas urbanas, con servicios completos, equipamiento urbano en escala significativa en la zona o zonas cercanas, usos de suelo habitacionales y/o mixtos y nivel socioeconómico de medio alto a alto.

**6:** Colonia catastral que corresponde a áreas urbanas, con servicios completos, equipamiento urbano en escala significativa en la zona o zonas cercanas, usos de suelo habitacional y/o mixtos y nivel socioeconómico de alto a muy alto.

**7:** Colonia catastral que corresponde a áreas urbanas, con servicios completos, equipamiento urbano de pequeña escala significativa, usos de suelo preponderantemente comercial y de servicios y nivel socioeconómico de medio bajo a alto.

**8:** Colonia catastral que corresponde a áreas urbanas, con servicios completos, equipamiento urbano de diversas escalas y con usos de suelo eminentemente industrial.

**9:** Colonia catastral que corresponde a áreas ubicadas en el suelo de conservación, con usos agrícola, forestal, pecuario, de reserva ecológica y/o explotación minera entre otros, con nulos o escasos servicios y equipamiento urbano distante.

**b)** Colonia catastral tipo enclave de valor: Porción de manzanas o conjunto de lotes de edificaciones de uso habitacional, que cualitativamente se diferencian plenamente del resto de lotes o manzanas del área en que se ubica en razón de que, no obstante que comparten una infraestructura y equipamiento urbanos generales con

las mencionadas áreas, cuentan con características internas que originan que tengan un mayor valor unitario de suelo que el promedio del área, como son la ubicación en áreas perfectamente delimitadas, el acceso restringido a su interior, que cuentan con vigilancia privada, mantenimiento privado de áreas comunes, vialidades internas y alumbrado público y/o privado.

El valor por metro cuadrado de suelo del enclave se encuentra contenido en el presente Código Fiscal.

Cada enclave de valor está identificada con la letra E, seguida de dos dígitos que corresponden a la Alcaldía, y una literal progresiva.

Quedan exceptuados como colonia catastral tipo enclave de valor, los inmuebles donde se ubiquen viviendas de interés social y/o popular.

**c)** Colonia catastral tipo corredor de valor: Conjunto de inmuebles colindantes con una vialidad pública de la Ciudad de México que por su mayor actividad económica repercute en un mayor valor comercial del suelo respecto del predominante de la zona, independientemente de su acceso o entrada principal de los inmuebles. El valor por metro cuadrado del suelo del corredor de valor se encuentra contenido en el presente Código Fiscal.

Cuando un inmueble colinde con más de una vialidad pública considerada como corredor de valor, en términos del párrafo anterior, el valor por metro cuadrado del suelo a aplicar será el valor del corredor de valor que resulte más alto.

Cada corredor está identificado con la letra “C”, seguida de dos dígitos, que corresponden a la Alcaldía, y una literal progresiva.

**IV. TIPO:** Corresponde a la clasificación de las construcciones, considerando el uso al que se les dedica y el rango de niveles de la construcción, de acuerdo con lo siguiente:

Para efectos de la clasificación de las construcciones se entenderá por cuerpo estructural al conjunto de cimentación, elementos verticales y horizontales, es decir, muros de carga, marcos rígidos y/o mixtos, entrepisos, cubiertas, acabados e instalaciones propias del cuerpo.

El rango de nivel será único para todos los usos comprendidos dentro de un mismo cuerpo estructural.

Los usos (A) Abasto e (I) Industria solo podrán aplicarse en cuerpos estructurales completos tipo nave industrial.

Para cada cuenta catastral, se deberán considerar la totalidad de superficies construidas, cubiertas y descubiertas contenidas en ella según aplique.

En los casos que en una cuenta catastral se encuentren varios cuerpos de edificios claramente separados, el valor total de la construcción se obtendrá de la suma del valor de cada uno de ellos, los cuales se calcularán en forma independiente.

personas o familias y comprende todo tipo de vivienda, a la que se incluyen los cuartos de servicio, patios, andadores, estacionamientos, cocheras y todas las porciones de construcción asociadas a dichas edificaciones. También se incluyen orfanatos, asilos, casas cuna, conventos y similares.

Cuando un cuerpo estructural no se encuentre asociada al uso habitacional, se clasificará de acuerdo a las características de uso, rango de niveles, clase y edad que le corresponda.

En caso de inmuebles de uso habitacional sujetos al régimen de propiedad en condominio las unidades de construcción privativas y las áreas de uso común que les correspondan en función del indiviso y que se establezcan en el referido régimen, se clasificarán conforme a las características que el mismo régimen establezca.

V. CLASE: Es el grupo al que pertenece una porción de construcción de acuerdo con las características propias de sus espacios, servicios, estructuras y acabados, la cual tiene asignado un valor unitario de construcción.

La clase será única por tipo.

Para determinar la clase de construcción a que pertenece cada edificación, se procederá conforme a lo siguiente:

En primer término se debe considerar el uso genérico del inmueble, identificándolo como habitacional o no habitacional; posteriormente se ubica de manera específica en la "Matriz de Características" para determinar la clase que aplica para el uso de que se trate.

Selección de elementos en la "Matriz de Características".

Cada "Matriz de Características" se compone de apartados en los cuales se consideran distintos elementos de la construcción. Por lo que se deberá seleccionar un solo elemento de los siete que componen cada columna, y así sucesivamente, para cada columna que integra esta matriz.

Determinación de puntos y clase en la "Matriz de Puntos".

Se deberá identificar los puntos que correspondan a cada elemento seleccionado en la matriz de características. Hecho lo anterior, los puntos se anotarán en el renglón denominado "Puntos Elegidos", y se deberán sumar los puntos de este renglón, ubicando el resultado en el cuadro "Total de Puntos".

Finalmente, el total de puntos se ubicará dentro de algún rango de la "Tabla de Puntos", determinándose de esa manera la clase a la cual pertenece la construcción del inmueble.

**a) HABITACIONAL**

En el caso de que el uso genérico del inmueble sea habitacional, se identifican las características de la construcción en la "Matriz de Características" para determinar clases de construcción de Uso: Habitacional y se utilizan los puntos aplicables en la "Matriz de Puntos" para determinar clases de construcción de Uso: Habitacional, conforme al procedimiento señalado en esta fracción.

Para vivienda multifamiliar, la superficie de construcción que se debe considerar como referencia para determinar la clase, es la que resulte de dividir la superficie total, incluyendo las áreas de uso común, entre el número de unidades familiares.

No se consideran en este caso los inmuebles sujetos a régimen condominal.

Para el cálculo de la matriz de los inmuebles sujetos a régimen de propiedad en condominio, deberán considerar como superficie de construcción la que resulte de sumar las áreas privativas más la parte proporcional de área común que le correspondan de acuerdo a su indiviso y que se encuentren en el mismo cuerpo constructivo.

**VI.**

**AVALÚO COMERCIAL:** El dictamen técnico practicado por persona autorizada o registrada ante la autoridad fiscal, que permite estimar el valor comercial de un bien inmueble, con base en su uso, características físicas, además de las características urbanas de la zona donde se ubica, así como en la investigación, análisis y ponderación del mercado inmobiliario, y que contenido en un documento o archivo electrónico que reúna los requisitos mínimos de forma y contenido establecidos en el Manual de Procedimientos y Lineamientos Técnicos de Valuación Inmobiliaria, sirve como base gravable para el pago de alguna de las contribuciones establecidas en el Código.

**AVALÚO CATASTRAL:** El dictamen técnico practicado por persona autorizada o registrada ante la autoridad fiscal, que sirve para apoyar al contribuyente para solicitar la modificación de datos catastrales y permite determinar el valor catastral de un bien inmueble con base en sus características físicas (uso, tipo, clase, edad, instalaciones especiales, obras complementarias y elementos accesorios) aplicando los valores unitarios de suelo y construcción, que el Congreso emite en el Código Fiscal que aplique.

**NORMAS DE APLICACIÓN**

**1.** Para la aplicación de la Tabla de Valores Unitarios de Suelo a un inmueble específico, se determinará primero la Alcaldía a que corresponda. Según su ubicación se constatará si se encuentra comprendido dentro de la Tabla de Colonia Catastral de tipo Enclave o de tipo Corredor, de ser alguno de estos casos le corresponderá al inmueble el valor unitario por metro cuadrado respectivo. En caso contrario se determinará la región con los tres primeros dígitos del número de cuenta catastral y su Manzana con los tres siguientes dígitos del mismo número de cuenta, a los cuales deberá corresponder una Colonia Catastral de tipo Área con un valor unitario por metro cuadrado. El valor unitario que haya correspondido se multiplicará por el número de metros cuadrados de terreno, con lo que se obtendrá el valor total del suelo del inmueble.

**2.** Para la aplicación de la Tabla de Valores Unitarios de las Construcciones, se considerarán las superficies cubiertas o techos y las superficies que no posean cubiertas o techos, según sea el caso. Para determinar el valor de la construcción se clasificará el inmueble en el tipo y clase que le correspondan: con este tipo y clase se tomará el valor unitario de la construcción, establecidos en la Tabla de Valores Unitarios de las Construcciones y se multiplicará por los metros cuadrados de la construcción, con lo que se obtendrá el valor total de la edificación.

Para la determinación del valor de la construcción de un inmueble de uso habitacional unifamiliar se considerarán todos los espacios cubiertos propios de este uso incluyendo, entre otros, los cuartos de servicio, patios, cajón de estacionamiento, cocheras.

En caso de inmuebles de uso habitacional sujetos al régimen de propiedad en condominio, se considerará, además, la parte proporcional de las áreas comunes que les corresponde conforme a su indiviso. Estas áreas comunes se considerarán como uso habitacional si están en el mismo cuerpo constructivo, si están separadas estructuralmente serán clasificadas de acuerdo a sus usos, rangos de nivel, clases y edades, se considerará cada uso cubierto y descubierto según aplique.

El valor total de la construcción de inmuebles de uso habitacional sujetos a régimen de propiedad en condominio se obtendrá de la suma del valor de la construcción privativa y el valor de la construcción común.

En los inmuebles de uso no habitacional, se considerará cada uso cubierto y descubierto según aplique se determinará su tipo y clase que le corresponda. Los inmuebles en esta situación deberán determinar el valor de la construcción con la suma total de cada una de ellas.

Para el inmueble que cuenta con distintos usos, incluso habitacional, cuando las personas residan de manera ocasional o para resguardar dichos inmuebles, se debe tomar el valor de cada una y sumarse a las restantes para así obtener el valor total de la construcción.

Al resultado obtenido se le aplicará una reducción según el número de años transcurridos desde que se terminó la construcción o desde la última remodelación que hubiere afectado a por lo menos un 30% de la superficie construida considerando todas las plantas del inmueble, en razón del 0.8% para cada año transcurrido, sin que en ningún caso se descuente más del 40%. Si los inmuebles tuvieran porciones de construcción con diferentes fechas de terminación, la reducción procederá por cada porción, según el número de años transcurridos desde que se terminó cada una de ellas.

**3.** Cuando el inmueble cuente con instalaciones especiales, elementos accesorios u obras complementarias, el valor resultante de aplicar lo señalado en el numeral 2, se incrementará en 8%.

Instalaciones especiales, aquellas que se consideran indispensables o necesarias para el funcionamiento operacional del inmueble de acuerdo a su uso específico, tales como, elevadores, escaleras electromecánicas, equipos de calefacción o aire lavado, sistema hidroneumático, equipos contra incendio.

Elementos accesorios, son aquellos que se consideran necesarios para el funcionamiento de un inmueble de uso especializado, que sí se convierten en elementos característicos del bien analizado como: caldera de hoteles y baños públicos, espuela de ferrocarril en industrias, pantalla en un cinematógrafo, planta de emergencia en un hospital, butacas en una sala de espectáculos, entre otros.

Obras complementarias, son aquellas que proporcionan amenidades o beneficios al inmueble como son: bardas, celosías, andadores, marquesinas, cisternas, equipos de bombeo, gas estacionario, entre otros.

**4.** El valor del suelo del inmueble, de sus construcciones y de sus instalaciones especiales, según sea el caso, se sumarán para obtener el valor catastral del inmueble.

La autoridad fiscal, mediante reglas de carácter general dará a conocer lo relativo a lo dispuesto en el párrafo anterior, en lenguaje llano y mediante folletos ejemplificativos.

**5.** El valor catastral determinado mediante avalúo comprenderá la suma de los valores de suelo del inmueble, de sus construcciones, instalaciones especiales, elementos accesorios u obras complementarias, según sea el caso.

**ARTÍCULO VIGÉSIMO SEGUNDO.-** Para los efectos de dar a conocer el nivel de desarrollo al que pertenecen las manzanas, para efectos de otorgar un subsidio a los usuarios de los derechos por el suministro de uso doméstico, así como doméstico y no doméstico simultáneamente (mixto) en la Ciudad de México a que se refiere el artículo 172 del Código, se presentan a continuación las siguientes tablas cuya aplicación se hará conforme a las definiciones y normas de aplicación que se indican:

**III. MANZANA.** Es un segmento de la región que regularmente está delimitada por tres o más calles o límites semejantes, representada por los tres siguientes dígitos del mencionado número de cuenta catastral.

**IV. MANZANA CON ID POPULAR.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener los niveles de desarrollo más bajos de la Ciudad. En esta categoría se agrupa, además, las manzanas que se encuentran dentro de la zona rural de la Ciudad de México.

**V. MANZANA CON ID BAJO.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener niveles de desarrollo bajo de la Ciudad.

**VI. MANZANA CON ID MEDIO.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener niveles de desarrollo medio de la Ciudad.

**VII. MANZANA CON ID ALTO.** Clasificación que engloba a las manzanas que guardan características socioeconómicas similares y que se tipifican por tener los más altos niveles de desarrollo de la Ciudad.

**NORMAS DE APLICACIÓN**

**1.** Para el establecimiento del subsidio otorgado a los usuarios del suministro doméstico de agua a que hace referencia el artículo 172 del Código, se determinará primero la alcaldía a la que corresponda la toma del usuario.

**2.** Posteriormente se identificará la región-manzana a la que pertenece mediante los seis primeros dígitos de la cuenta catastral que corresponde al inmueble de uso doméstico, así como doméstico y no doméstico simultáneamente (mixto), donde se encuentra la toma.

**3.** Al identificar la región-manzana dentro de la Alcaldía se observará el tipo de manzana al que pertenece y ese remitirá, de manera directa, al subsidio que le corresponde al usuario de la toma de acuerdo al artículo 172 del Código.
